Nomad Technologies Provides Critical Communications To Several U.S. Fire Crews

IP Access International joins Nomad Technologies providing satellite technology solutions

Kalispell, MT – August 8, 2007 — Nomad Technologies is providing critical communications to several fire crews in Idaho and Montana. A state of emergency was declared in Montana on Sunday because of several large wildfires, including one that has crept to within a mile of several homes and destroyed at least one.

Nomad is currently assisting with the Skyland Fire and Brush Creek Fire in Northwestern Montana. The Skyland fire is an estimated 33,430 acres burned south of Glacier National Park. The fire is 40 percent contained. The Brush Creek fire is an estimated 18,927 acres, or 29.5 square miles, and has burned in the Flathead and the Kootenai national forests, west of Whitefish. Nomad is also assisting the Rattlesnake fire in the Nez Perce National Forest and Poe Cabin Fire near Craig Mountain - both in Idaho.

“IP Access International is proud to support Nomad Technologies in their efforts to provide critical communications to fire fighting efforts in Montana and Idaho.” says Bryan Hill, president of IPA. “This dry season has presented one of the most challenging years for fire crews and we are proud to support the fighting effort.”

Fixed Satellite System Deployed at Rattle Snake Fire, Nez Perce National Forest

About Nomad Technologies

Nomad Technologies, Inc. has been providing quality mobile command and communication solutions for emergency rental or purchase since 2002. Nomad was incorporated with the purpose of providing national Incident Command teams and other public and private sector emergency management agencies with mobile interoperable communication tools to provide mission critical communications where local infrastructure is absent or compromised. Nomad specializes in collaboratively working with local, state and federal emergency management personnel to design, develop and deliver custom turn key communication solutions. www.nomadtechs.com
