

EnGo 265

LTE mobile transmitter and internet gateway

Reliable, simple to use, and built tough for field use, EnGo 265 is designed for mobile video professionals who demand high performance.

EnGo 265 efficiently encodes and securely transmits high-quality live video from the field while also empowering mobile teams to work more efficiently with resilient, high-bandwidth, wireless internet access. Featuring Dejero's renowned Smart Blending Technology, the dependable EnGo 265 reliably performs in the most challenging network conditions.

EnGo 265 works seamlessly with any unmanned aerial system (UAS), helicopters, and portable gateway applications to share high-quality live video from aerial vantage points that enhances situational awareness during disaster and accident response and search and rescue efforts. Its versatile options include a compact backpack for portability and vehicle-rated video encoding/transmitting capabilities.

By simply securing the EnGo into the antenna dock and quick-connecting to high-gain external antennas, field teams can boost cellular reception, bandwidth and resiliency in areas where signals are weak or networks are congested.

MOBILITY AND VERSATILITY

Easily go from backpack to vehicle dock with one cost-effective solution

DRAMATICALLY BOOST CELLULAR RECEPTION

Connect to the vehicle's rooftop antennas, optimally arranged to boost cellular reception for always on connectivity

AGNOSTIC SOLUTION

No limitations—share real-time video with response teams
