OUR COMMUNITY

IP Access has been delivering secure communication solutions to governments and enterprises for over 20 years.

We are an industry leading provider of quick-deployment hybrid-based communications solutions, offering disaster-resistant, mission-critical connectivity for both fixed and mobile requirements. Our solutions blend cellular and satellite technologies for seamless connectivity, no matter the location or circumstance.

The IP Access community includes over 1000 agencies such as police, fire, sheriff, national guards, as well as critical infrastructure companies; all with a mutual goal of being able to communicate at all times regardless of disaster or attack.

Our community is connected to each other through the First Responder Net allowing resilient connectivity even when the Internet is disabled. With the RedPHONE, Mutualink, and other critical applications hosted "Off-the-Grid", our community will always have the ability to collaborate during the most critical times.

We take pride in delivering fully integrated cellular and satellite solutions that can be deployed in minutes and supported by a world class 24/7/365 support center.
