

Why Settle For Limited Connectivity Options When You Can Have Them All?

Stay Connected When It Matters Most

SuperGIG™ is the industry’s most advanced multi-network connectivity solution, designed to keep public safety agencies, first responders, and critical enterprises online—even in the most challenging environments. By seamlessly blending major LTE carriers, LEO satellite (Eutelsat OneWeb), and GEO satellite, SuperGIG™ ensures your team has uninterrupted access to mission-critical applications, real-time data, and reliable communications when and where you need them.

Why SuperGIG™?

- Uninterrupted Connectivity** – Seamless failover between LTE and satellite for always-on communication
- High-Speed Performance** – Get up to 500 Mbps for smooth video streaming, cloud access, and remote operations
- Expansive Coverage** – Operates nationwide, covering remote, off-grid, and disaster-stricken areas
- Secure & Reliable** – Enterprise-grade encryption ensures data security and integrity
- Plug & Play Deployment** – Quick setup for mobile command centers, fleets, and field operations

How It Works

SuperGIG™ dynamically selects the best available connection:

Multi-Carrier LTE
AT&T, Verizon, T-Mobile, FirstNet

LEO Satellite
Eutelsat OneWeb for high-speed, low-latency coverage

GEO Satellite Backup
Additional redundancy for critical operations

Industries That Trust SuperGIG™

- Public Safety & First Responders** – Police, fire, and EMS rely on SuperGIG™ for real-time data and comms in the field
- Critical Infrastructure & Utilities** – Maintain remote site monitoring, SCADA connectivity, and outage response operations
- Fleet & Mobile Operations** – Keep government fleets, emergency vehicles, and workforces connected nationwide
- Mining, Oil & Gas** – Extend connectivity to remote drilling sites and operational bases
- Manufacturing & Industrial Sites** – Enable smart factory automation and IoT deployments

SuperGIG™ Deployment Options

- ◆ **SuperGIG™ LEO GO Case** – Rugged, portable solution for field operations
- ◆ **Fixed & Vehicle-Mounted** – For mobile command centers, emergency response units, and remote work sites
